STINGMASTER MULTI-PORT STING VALVE

PATENTED

DESIGNED FOR OIL STORAGE TANKS

FOR SALE

STINGMASTER MULTI-PORT STING VALVE

THIS NEW AND PATENTED STINGMASTER MULTI-PORT STING VALVE PROVIDES A MORE THOROUGH TANK FLOOR CLEANING THEREFORE REDUCING SAND UPS AND INCREASING PRODUCTION.

THE STINGMASTER MULTI-PORT VALVE IS ATTACHED TO THE LOWER PORTION OF THE TANK WALL.

PROJECTED ANGLES OF STINGERS WHEN CLEANING TANKS

FITTING FOR OIL STORAGE TANKS TO FACILITATE CLEANING

CRUDE OIL EXTRACTED FROM UNDERGROUND FORMATIONS COMMONLY CONTAINS SUSPENDED SEDIMENTS SUCH AS SAND. THE SAND IS EXTRACTED WITH THE CRUDE OIL, AND SETTLES TO THE BOTTOM OF THE TANK AND ACCUMULATES AS SEDIMENT. THIS SEDIMENT WILL EVENTUALLY CAUSE BLOCKAGE OF THE PORTS IN THE STORAGE TANK.

IMPROVES CLEANING BY PROVIDING A MULTITUDE OF PORTS

THE OUTER PORTS OF THE STINGMASTER ARE ARRANGED AT ANGLES SUCH THAT THE PRESSURE TUBE PASSING INTO THE TANK PASSES OVER A FIRST SECTION OF TANK FLOOR AND THE NEXT PORTS ALLOW PASSAGE OVER THE SECOND SECTION AND THIRD SECTION OF THE TANK FLOOR.

STINGMASTER MULTI-PORT STING VALVE MEETS AND EXCEEDS API TANK MANUFACTURING STANDARDS.

REDUCE SAND UPS AND INCREASE PRODUCTION

STINGMASTER VALVE CAN BE INSTALLED INSIDE ENVIRO VALT AS WELL
